

KOI TOWER MONTERREY

MEXICO HIGHEST TOWER, MITSUBISHI ELECTRIC, WE RAISE QUALITY AT AMAZING LEVELS

KOI Tower, Mexico highest skyscraper, it is a great example what Mitsubishi Electric offers to Mexico and the world, that is provide security, reliability and give a great value added our products.

This skyscraper that consists almost 280 meters height, 64 apartment and 9 underground parking, demands that products used for transportation and mobility of users be quick and high quality.

For Mitsubishi Electric is an honor to work hand in hand to achieve this project, cause it shows our products are high quality and also provide durability that highlights great Japanese technology.

In an interview with Eng. Jorge Martinez Paez from de company IDEI, KOI Tower project Director, he talks to us that the experience with Mitsubishi Electric has been favourable, since its durability and maintenance costs are better than the competition, also that displacement is silent and does not produce vibration, thus giving comfort to move from one floor to another.
