About Us

CKD USA was incorporated in 1985 as a wholly owned subsidiary of CKD Corporation, Komaki, Japan, with the primary responsibility of providing sales and technical support for the Americas. The company's main product offerings are pneumatic and electric actuators and components, semiconductor process components, dryers, and general-purpose and directional controls valves. These products are utilized in a wide variety of manufacturing environments, from the automotive industry to semiconductor manufacturing..

e-F@ctory Solutions Provided

Since its inception, CKD has researched and developed various kinds of products while constantly predicting and meeting future needs as a pioneer in automation technology. Today, CKD product lineups have tens of thousands of items, and they play an active role in a broad range of industrial fields. CKD offers a wide range of automatic machinery, pneumatic and fluid control systems, and electric actuators with drives supporting CC-Link® protocols and especially CC-Link IE TSN.
