# Indexer

#### **Mitsubishi Solution**

Single Axis Motion Controller: **MR-MQ100** Servomotor: **HF-SP**, **HF-JP**, **HF-MP**  Servo Amplifier: MR-J3-B Safety Graphic Operation Terminal: GOT1000 Series

### **Example Applications**

Indexer or point-to-point applications can be adapted to perform a variety of functions. Some example machine applications include:

- ♦ Turret
- Rotary table
- Direct drive
- Indexing table

### Overview

Indexer applications involve an axis of servo motion to index a rotary table or a turret without using a complicated motion program. Anywhere from 15 to 255 stations can be selected with degree units via digital inputs, using a GOT or through an Ethernet connection. Even point-to-point simple linear movements can be accomplished with this system.

## **Features**

**Advantages and Benefits**
