About Us

Founded in 1926, Takebishi is a leading global supplier of OPC standards based communication protocols (Drivers). Headquartered in Japan, Takebishi has over 600 employees and engages in the sales, systems design and software development for information systems and factory automation systems.

e-F@ctory Solutions Provided

Communication software that bridges the operations information from devices and systems at the production site with host systems such as HMI, SCADA, Historian, MES and other solutions. The product is called DeviceXplorer and it is based on the international standard, OPC, for communications to client systems. Connectivity includes communications drivers to support over 230 models of control equipment such as PLCs, sensors, and I/O as well as more complex communications such as BACnet, DNP-3, 61850, 60780 and others. DeviceXplorer is used all over the world in every conceivable application.

Complementary Products

Programmable Controllers; HMI/SCADA; IoT Gateways; Historians, MES

Core Technology

OPC Servers

Industries Served

Aerospace	Medical and Life Sciences
Aggregates	Printing
Automotive	Process
Food and Beverage	Pulp and Paper
Forestry and Mining	Semiconductor
Marine	Tire
Material Handling	Utilities
