

Mitsubishi Electric Integrated System Programming Suite – iQ Works

The iQ Works suite contains and maintains seven different core software packages; MELSOFT Navigator, GX Works3, GX Works2, MT Works2, GT Works3, FR Configurator2 and RT-Toolbox3 Mini. MELSOFT Navigator is the umbrella software that serves as the system configuration software and launching pad for the other four packages. Users are able to graphically assemble their networks, controllers, special function modules, and I/O for sequence control, along with their motion controller modules and GOT2000 and GOT1000 HMIs.
